Professional Summary

A versatile professional with over twenty-five years of experience bridging operational management and technical execution. Since 2019, I have operated as an independent Technical Consultant, delivering full-stack web applications, data dashboards, and process automation tools. I combine the strategic discipline of an Operations Manager with the technical precision of a Senior Laravel Developer. I specialize in building secure, data-first systems that solve complex business problems, leveraging a unique background in team leadership to manage projects from initial scoping to final delivery.

Core Competencies

Category	Skills & Technologies
Web Development	Laravel (13+), PHP (8.5+), Inertia.js, React, TypeScript, HTML5, CSS3 (Bootstrap 5), RESTful APIs
Data & Analytics	SQL Optimization, Database Design (MySQL/PostgreSQL), Structured Reporting, Data Visualization (Chart.js), Redis
Project Management	End-to-End Delivery, Stakeholder Management, Agile Workflows (Jira/Trello), Process Automation, Scoping & Documentation
Leadership & Operations	Team Mentoring, Resource Scheduling, Budgeting, Conflict Resolution, Performance Management

Professional Experience

Technical Consultant & Full-Stack Developer

Independent Contractor | 2019 – Present

In my current role as a Technical Consultant, I lead the full lifecycle of bespoke web applications, ranging from initial requirement gathering and system architecture to final deployment and ongoing maintenance. I have engineered high-performance dashboards and reporting tools for retail and agency clients, with a specific focus on SQL query optimization and real-time KPI tracking. By architecting secure systems using Laravel, React, and TypeScript, I ensure all projects adhere to strict PSR-12 standards and “Security by Default” principles, including robust XSS and CSRF protection. My work in process automation has significantly improved operational efficiency for my clients, often reducing manual reporting time by up to eighty percent through automated data pipelines and integrated RESTful APIs.

Operations & Team Manager

Retail & Hospitality Sector | 2015 – 2018

During my tenure as an Operations Manager, I oversaw daily operations for high-volume environments, managing multi-disciplinary teams and complex shift schedules. I was responsible for strategic planning, including budgeting, stock control, and performance auditing, while ensuring total compliance with health and safety standards. I led recruitment efforts and mentored junior team leads, fostering a culture of accountability and clear communication. The leadership and planning skills developed during this period now serve as the foundation for my project management approach in technical environments.

Team Lead & Supervisor

Retail & Hospitality | 2012 – 2015

In this capacity, I managed shift-based teams and served as the primary point of contact for customer escalations and operational troubleshooting. I focused on maintaining high service standards while balancing the immediate needs of the team and the broader objectives of the business.

Senior Customer Service Advisor

Retail & Hospitality | 2006 – 2012

I was recognized for my composure under pressure and consistent reliability, which led to my appointment to additional responsibilities in staff training and complex case management. I played a key role in supporting team leads during peak periods and ensuring a seamless customer experience.

Technical Toolkit

Area	Tools & Standards
Languages & Frameworks	PHP (Laravel), JavaScript (React, Inertia.js), TypeScript, SQL, HTML/CSS
Databases & DevOps	MySQL, PostgreSQL, Redis, Docker, Git, DBeaver, HeidiSQL
Quality & Compliance	Pest, PHPStan, PSR-12 Compliance, “Security by Default”
Collaboration	Jira, Confluence, Trello, Slack, Google Workspace, Microsoft Office

Education & Qualifications

Year	Qualification	Institution/Body
2022	NCFE Level 3 — Team Leading & Management	NCFE
2004	AVCE Level 3 — Information & Communication Technology	Technical Institute
2004	BTEC Level 2 — PC Maintenance & Repair	Technical Institute
2003	GCSEs (A–C) — English, Mathematics, IT, 3x Sciences	Secondary School
